

# Access to FEMALE CONDOMS 4 all!

[www.condoms4all.org](http://www.condoms4all.org)

We work on reaching the millennium  
development goals 3, 4, 5 and 6!

Buitenlandse  
Zaken

# **The FEMALE CONDOM (FC) should be accessible, affordable and available 4 all...**

because every year again • **80 million** unwanted pregnancies

- **20 million** unsafe abortions
- infection **with STDs of 170 million women**
- death **of AIDS of 1.5 million women**
- **death of 0.5 million women due to complications during delivery**

## **The FEMALE CONDOM is a solution that works for women now! It is:**

- simple and easy to use
- thoroughly tested and of assured quality
- the only woman-initiated family planning method that protects with 99% certainty against unwanted pregnancy and against STDs including HIV/AIDS
- rated as highly satisfying by both women and men

Women do not have access to Female Condoms. They are simply not available and too expensive. Oxfam Novib, WPF and IDA Solutions in collaboration with the Dutch Government are working together to make the FC accessible, affordable and available 4 all. The Directorate-General for International Cooperation (DGIS), the Hewlett Foundation and UNFPA support us. But above all, women in developing countries encourage and join us to work towards improving accessibility of the Female Condom.

**Become an advocate for the Female Condom yourself!**
